

DHM Checklist

Here is a checklist you can use as you create your own decentralised hard money

Currency Name

Peg to gold (e.g. 1,000 XYZ = 1oz of physical gold)

Hard cap (the fixed amount of the currency for all time)

Blockchain (how people are going to keep track of how much they own)

- Waves
- Ethereum ERC-20
- Own blockchain
- Other

Initial Distribution (e.g. 10,000 tokens each to 2 million people)

Mass Transfer Mechanism (how are you going to send the initial tokens to people's wallets? E.g. Waves.Exchange has a mass transfer facility.)

Regulation (As Issuer are you compliant with local and international regulations? Does your website meet fair trading standards?)

Your 1% (Will you be taking up to 1% of the tokens as a fee?)

Marketing (How are you going to let people know about the currency?)

Transparency (How can people check the number of wallets you have transferred the initial tokens to and see how much has gone in to each one? E.g. Waves and Ethereum have an "Explorer" where you can enter a wallet address and view transactions.)

Privacy (Have you ensured you only ask for people's wallet ID to transfer tokens to e.g. not linked to an email or any other personal identifier?)

Badge (You can use [this logo](#) on your website so people know you are adhering to DHM guidelines.)
